ProCash 5000 mini

Automated Teller Safe

The ProCash 5000 mini automated teller safe features a small footprint that lets financial institutions and postal services dispense cash efficiently and securely in open-plan customer zones, too.

As an undercounter model, the ProCash 5000 mini is ideal for installation at sites where there is little space.

Cash transactions are clearly associated with the appropriate teller by lighted arrows and a numeric display near the output slot.

Electronic locks secure the optional deposit box and the safe with a dual code (according to UVV rules) and with time delay.

CASSETTE-BASED DISPENSING SYSTEM

- Up to 3 sealable cash-out cassettes
