NAMOS central

Modular, easy to use and efficient -
a standards-based Head-Office solution
for the Petroleum/Convenience business

Chain environments require a simple and effective means to manage and analyze their stores. With our user-friendly and easy to understand Head-Office solution, Petroleum/Convenience Retailers will gain a clear picture of how their operation is performing and what needs to be done in order to reach their maximum business potential. It streamlines business processes, increases efficiency and cuts down costly errors.

NAMOS central allows companies to effectively manage and control all aspects of their Petroleum/Convenience network.
Designed to run at the corporate head-office or regional branch-office, NAMOS central is suitable for all business scenarios and types of operation. It links to the Back-Office system at each store

location to upload store transactions and to download Head-Office changes to the store.

NAMOS central consolidates information based on corporate hierarchy, business units, geography or by any customized group of stores that share similar attributes. It is a proven component of
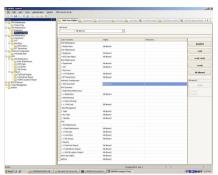

A one stop solution:
■ The *i*-SERVICE STATION

Based on an open platform architecture NAMOS central contains all the capabilities and functional foresight required to solve business requirements unique to the Petroleum/Convenience industry. It easily integrates third party solutions and provides connectors to other suppliers or ERP systems.

User Administration

Fuel Stock Management

Central Price Book

■ Flexibility and openness thanks to standards and modularity

Based entirely on Microsoft platforms and technologies (VB, .NET, SQL SERVER) and using industry standards like XML, NAMOS central meets the highest technological requirements. It has an easy to learn and intuitive Graphical User Interface.

The modularity and openness of NAMOS central makes communication with other third-party solutions simple. NAMOS central is tightly integrated into NAMOS retail BOS and NAMOS compact POS solution. In addition to its own Head-Office functionalities NAMOS central can be seamlessly interfaced into existing ERP Systems.
