Technical facts

- Consists of bank note and coin module
- Open software platform
- Fully integrated via standard interface into NAMOS compact POS
- Fast and easy remote configuration, maintenance and upgrades

Retail organizations operate in highly competitive markets. Today's mostly manual cash handling offers major potential for streamlining, from the POS to the cash office to the follow-up work of cash-in-transit operators and cash centers. The goal is to automate routine work or to reduce the effort and costs involved through process reengineering activities.

With NAMOS cash, Wincor Nixdorf offers a cash management solution to standardize the cash supply and removal processes for Petroleum companies. It is a highly scalable solution for staff-attended and self-service operations. It reduces the cash process costs, eliminates discrepancies, prevents thefts and frees your staff from time-intensive tasks such as counting, recounting and auditing cash.

The improved security, tighter control and enhanced productivity are major advantages. NAMOS cash is fully integrated into NAMOS compact POS solution. It is an additional component of

A one stop solution:

■ The i-SERVICE STATION

NAMOS cash consists of two different devices, a coin recycling module and a bank note module. Both systems used in conjunction ensure a closed cash cycle at the POS. The systems feature a compact design and a user-friendly interface. With NAMOS cash, store operator's will experience a low investment risk. The immense cost savings in best time will implicate a quick positive Return of Investment.
