Pay Tower 150

Non-cash self-service payment terminal

Self-service payment is so easy

The Pay Tower 150 is a cashless self-service payment terminal that offers customers an enhanced service by separating the scanning and payment of items at the checkout. Once a customer's items are scanned, registered and bagged, after using for e.g. a self-scanning device or an automated scanning solution, transactions are recalled at the Pay Tower 150 for payment. Customers can use cards or even newer technology like NFC enabled smartphones to finalize their transaction. Designed for busy retail stores that have a high volume of non-cash transactions, the Pay Tower 150 enables retailers to offer self-service and an improved throughput at the checkout in a very small footprint.

Made for all retail stores

Whether you have a DIY, grocery, household or electronics store, the Pay Tower 150 is the ideal solution to breathe life into your checkout area. As part of the Tower Line 150 suite the Pay Tower 150 is unique in its structure because of its modular composition that allows you to de-

sign and configure the right self-service payment terminal for your store. The Pay Tower 150 can be used for installation on either the right or left side and can be integrated with additional modules such as coupon acceptance and EFT-terminals.

Perfect harmony

The Pay Tower 150 can be used in combination with other self-service terminals, including coin and note recycling systems, so you can build the perfect mix of payment solutions in alignment with the payment behaviors of your customer.

Based on standards

The Pay Tower 150 features best-in-class components in an optimized footprint. The system complies with industry regulations (ADA II) covering user ergonomic standards for self-service terminals, further accentuating the advantages of the systems design and practicality.

Benefits

- Improved efficiency and customer service
- More customer choice
- Small footprint
- Can be configured into many checkout scenarios
- Scalable modular design
- Fully ADA II compliant

TPiSCAN software platform

TPiSCAN by Wincor Nixdorf is a modular software platform for self-service terminals that integrates easily with existing POS applications. With its intuitive interface, TPiSCAN is used to control your Pay Tower 150. Running on both Windows and Linux, TPiSCAN is based on international standards and has been developed to ensure optimum user guidance. The highly customizable application can be quickly and easily tailored to your own specific requirement so you can create a unique multi-media rich interface for your self-checkout system.

WINCOR NIXDORF

Services

Wincor Nixdorf's fast, professional manufacturer service is available as an option for the Pay Tower 150 as part of the complete solution offer. Tailored services enable the highest possible system availability and security worldwide due to standardized service processes and efficient remote management based on the Wincor Nixdorf eServices Platform®. By request retailers can hand over their complete IT operations and the control of their cash processes to Wincor Nixdorf's service organization.

Consulting and integration

Our focus is to provide our customers with the best business benefits as quickly as possible. To make this happen, our Professional Services practice can provide analysis and concept design services to define the ideal deployment and integration scenario for your business requirements. We will also deliver integration services as part of our Professional Services portfolio to ensure the smooth and timely deployment of systems throughout your store network.

TECHNICAL DATA

General
Dimensions (H x W x D) in mm
- 1,407 x 230 x 794
Weight
- Approx. 100 kg

Payment functionalities
Cashless Payments
- EFT terminals from different vendors
- Signature pad/fingerprint scanner (optional)
- NFC terminals (optional)
Others
- Coupons/vouchers
- Deposit receipts
- Magnetic swipe card reader (optional)

Scanning/printing functionalities
Vertical barcode scanner
Thermal printer

Customer interaction
15'' TFT LCD, infrared touch screen
Loudspeakers
Proximity sensor
Lighting for input and output slots

System unit
System
- BEETLE /M-II plus
Software
- Windows, Linux, WNLPOS, POSReady
- Standard interface to POS applications
- Graphical user interface

Chassis
Customer-specific color scheme (optional)
Compliant with ADA II

Security
Waiter lock for attendant mode
Status lights

Services (optional)
- Global Deployment Services: rollout and installation
- Availability Services: fast recovery and regular maintenance services
- Operational Services: remote management and help desk for fast resolutions as well as for user support
- Automated processing of cashless transactions

Operating conditions
Power supply
- Supply voltage range: 110 – 120 V; 220 – 240 V
- Nominal frequency: 50/60 Hz
Certification
- CE, CSA
