**BIZERBA**

- Software solutions development, implementation and support;
- Banking and retail trade hardware sales;
- Hardware technical maintenance and service;
- Outsourcing services;
- IT infrastructure monitoring;
- Training and consulting;
- Spare parts delivery.

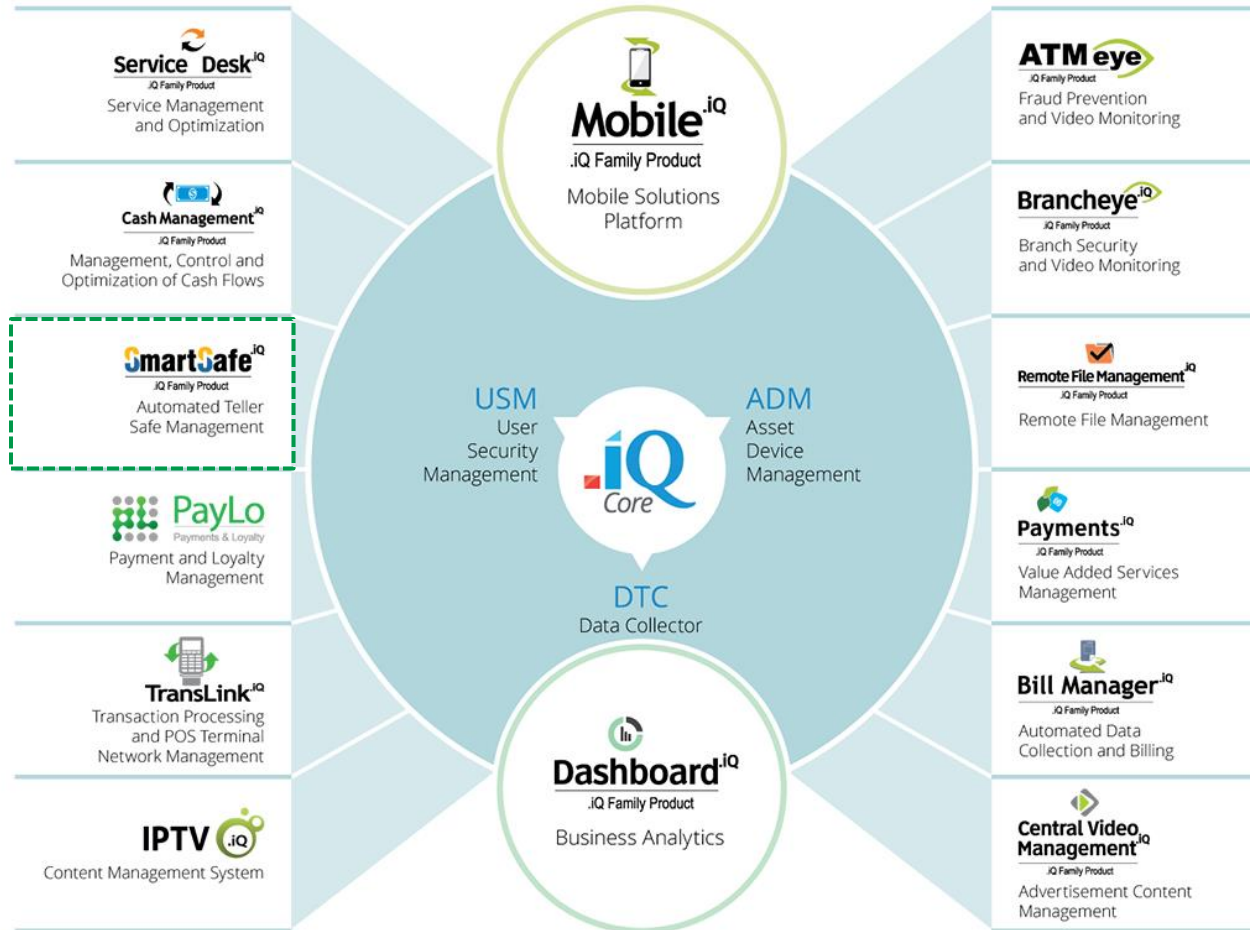

# Main Facts

- 200 employees
- 7 subsidiaries in different countries
- 20 years of experience servicing banking and other types of equipment
- 39 service centers in 8 countries
- More than 100 certified service engineers
- Partnerships in more than 60 countries
- Second in the world Wincor Nixdorf certified Training Center, since 2008
- Compliance with ISO 20000, ISO 27001
- PCI PA-DSS Level 1 certified

# Software .iQ Family

# Automated Teller Safes (ATS) Management Solution

The solution is intended to manage ATSs and attached peripherals in order to automate cash deposit/withdrawal operations at bank branches, post offices etc. The system can be implemented as standalone or integrated into Bank Information System (BIS).

# Areas of Implementation

**Banks**

**Credit  
Companies**

**Post  
Offices**

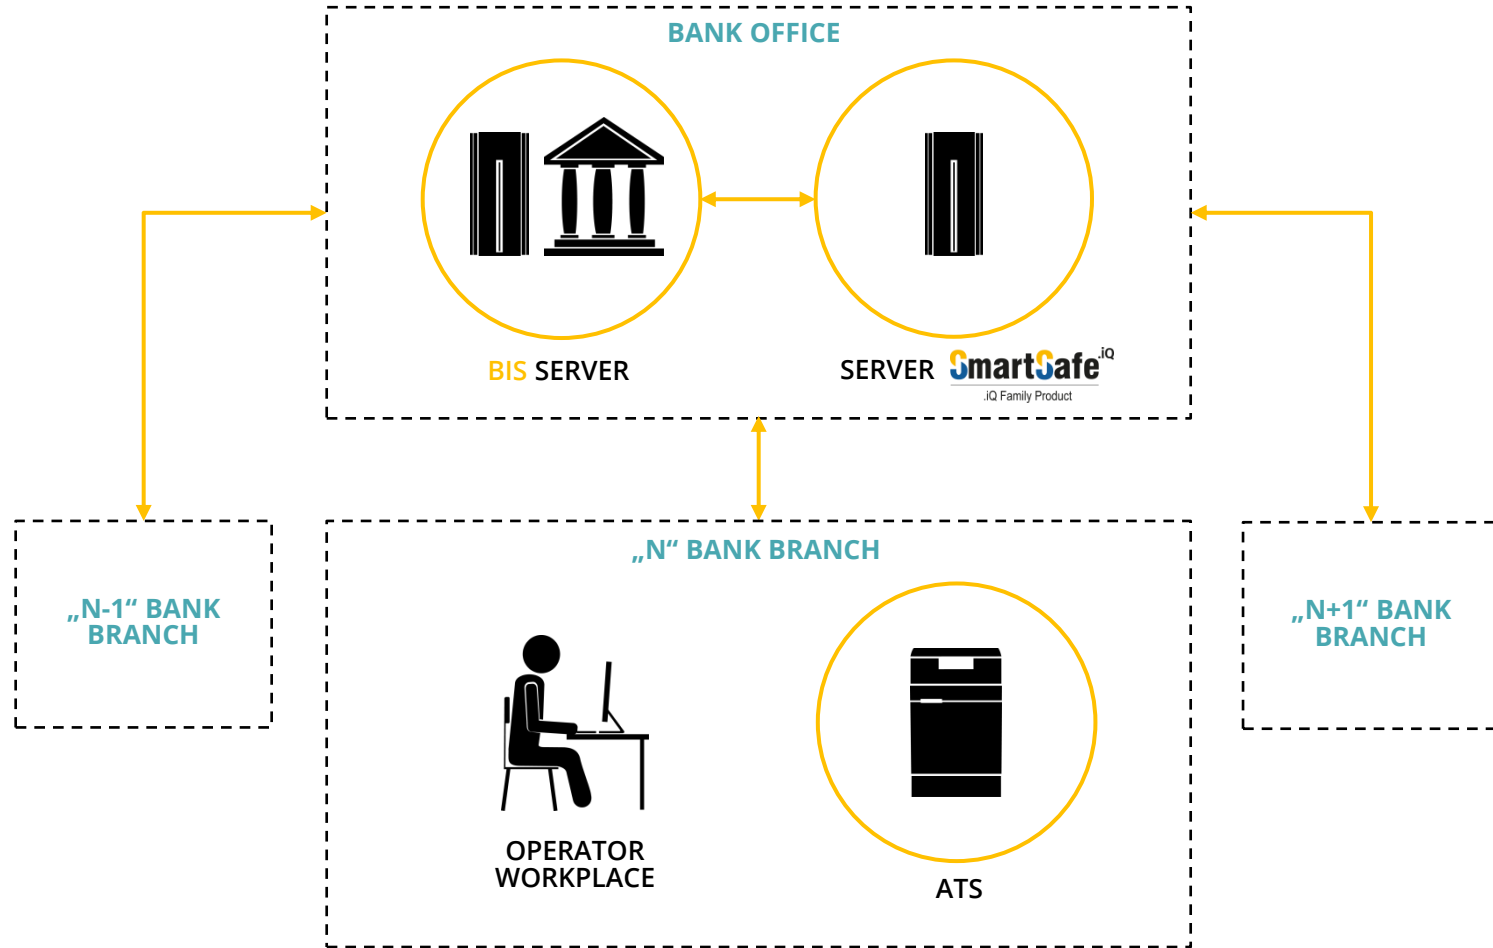

**Other**

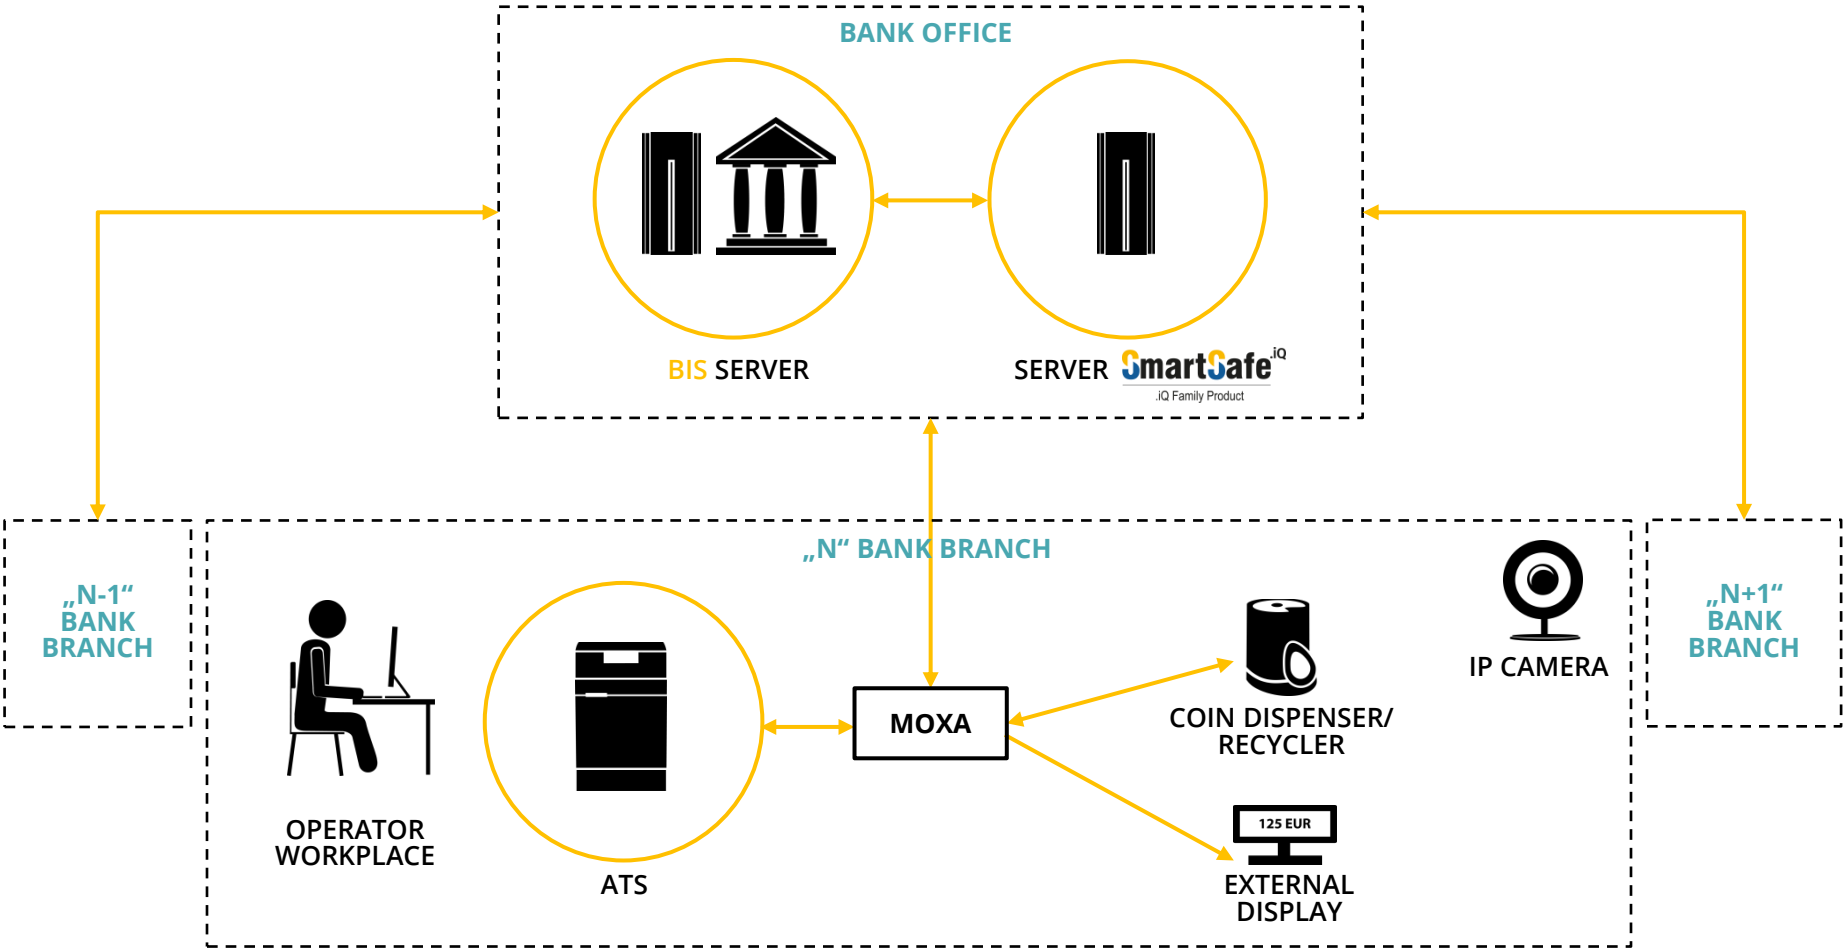

# The Main Tasks

- to reduce the time spent on cash deposit/withdrawal operations;
- to automate cash deposit/withdrawal operations;
- to automate cash load/unload (replenishment);
- to control and monitor daily procedures;
- to monitor cash flow status on-line;
- availability of various reports;
- software and hardware administration.

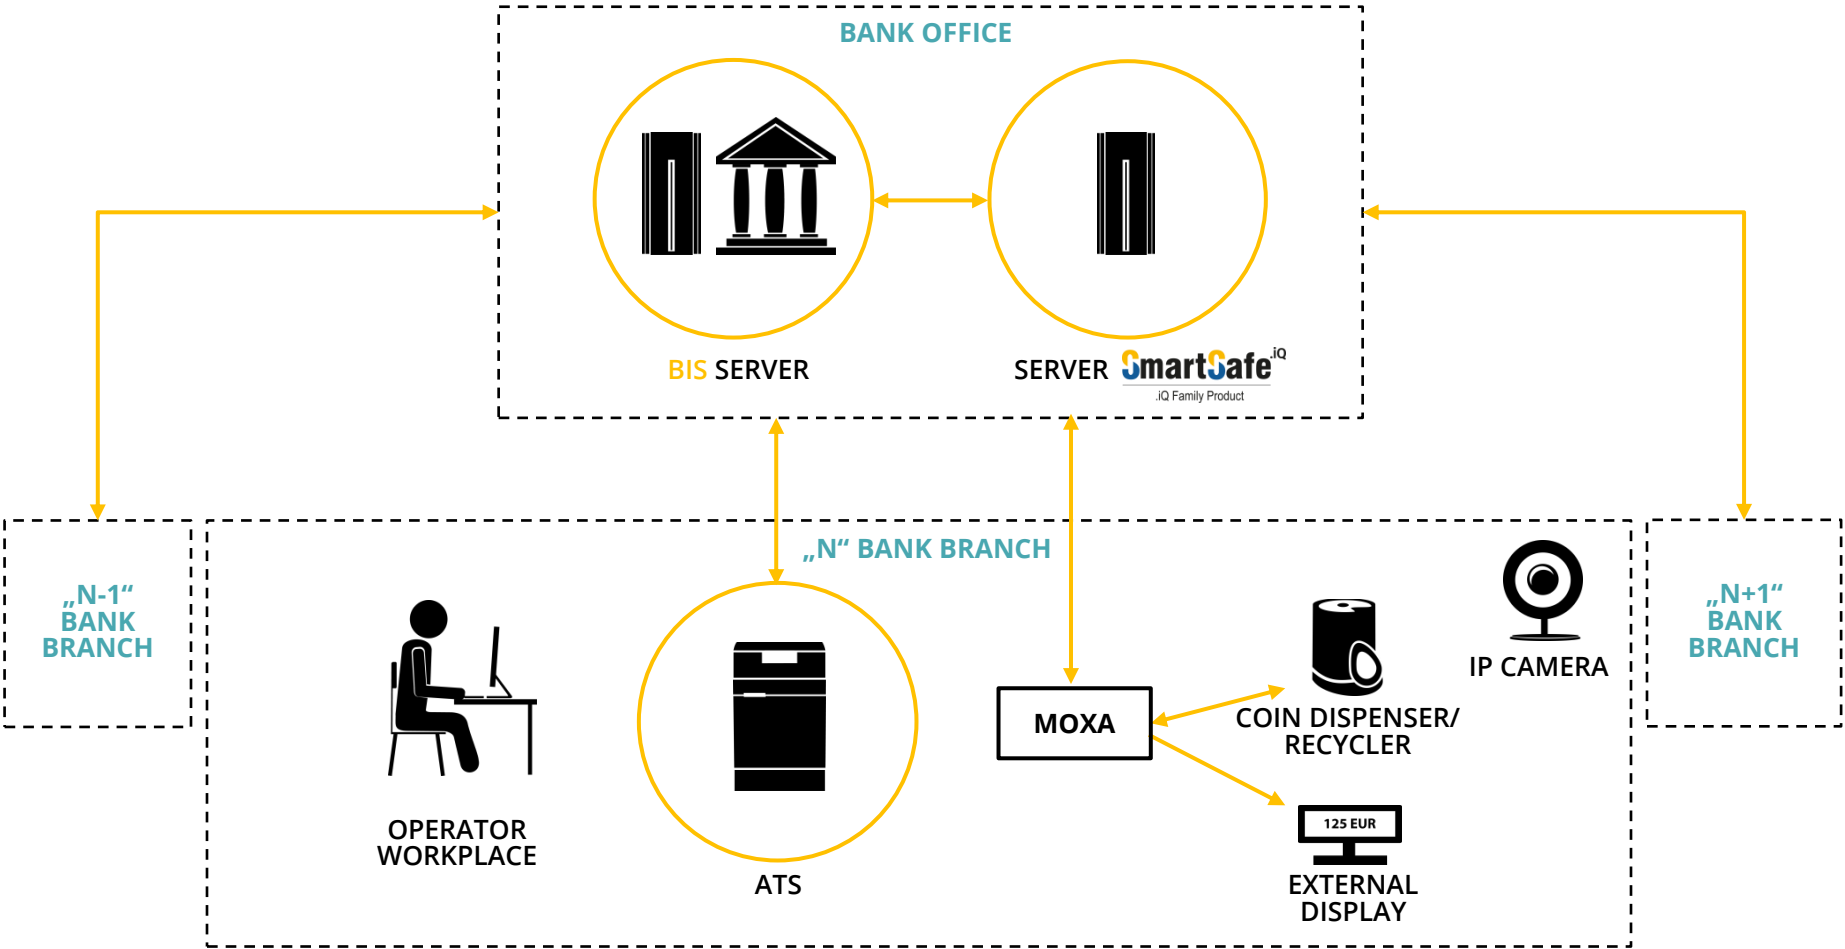

# Basic Connection Scheme

# Scheme of Connection via MOXA (1)

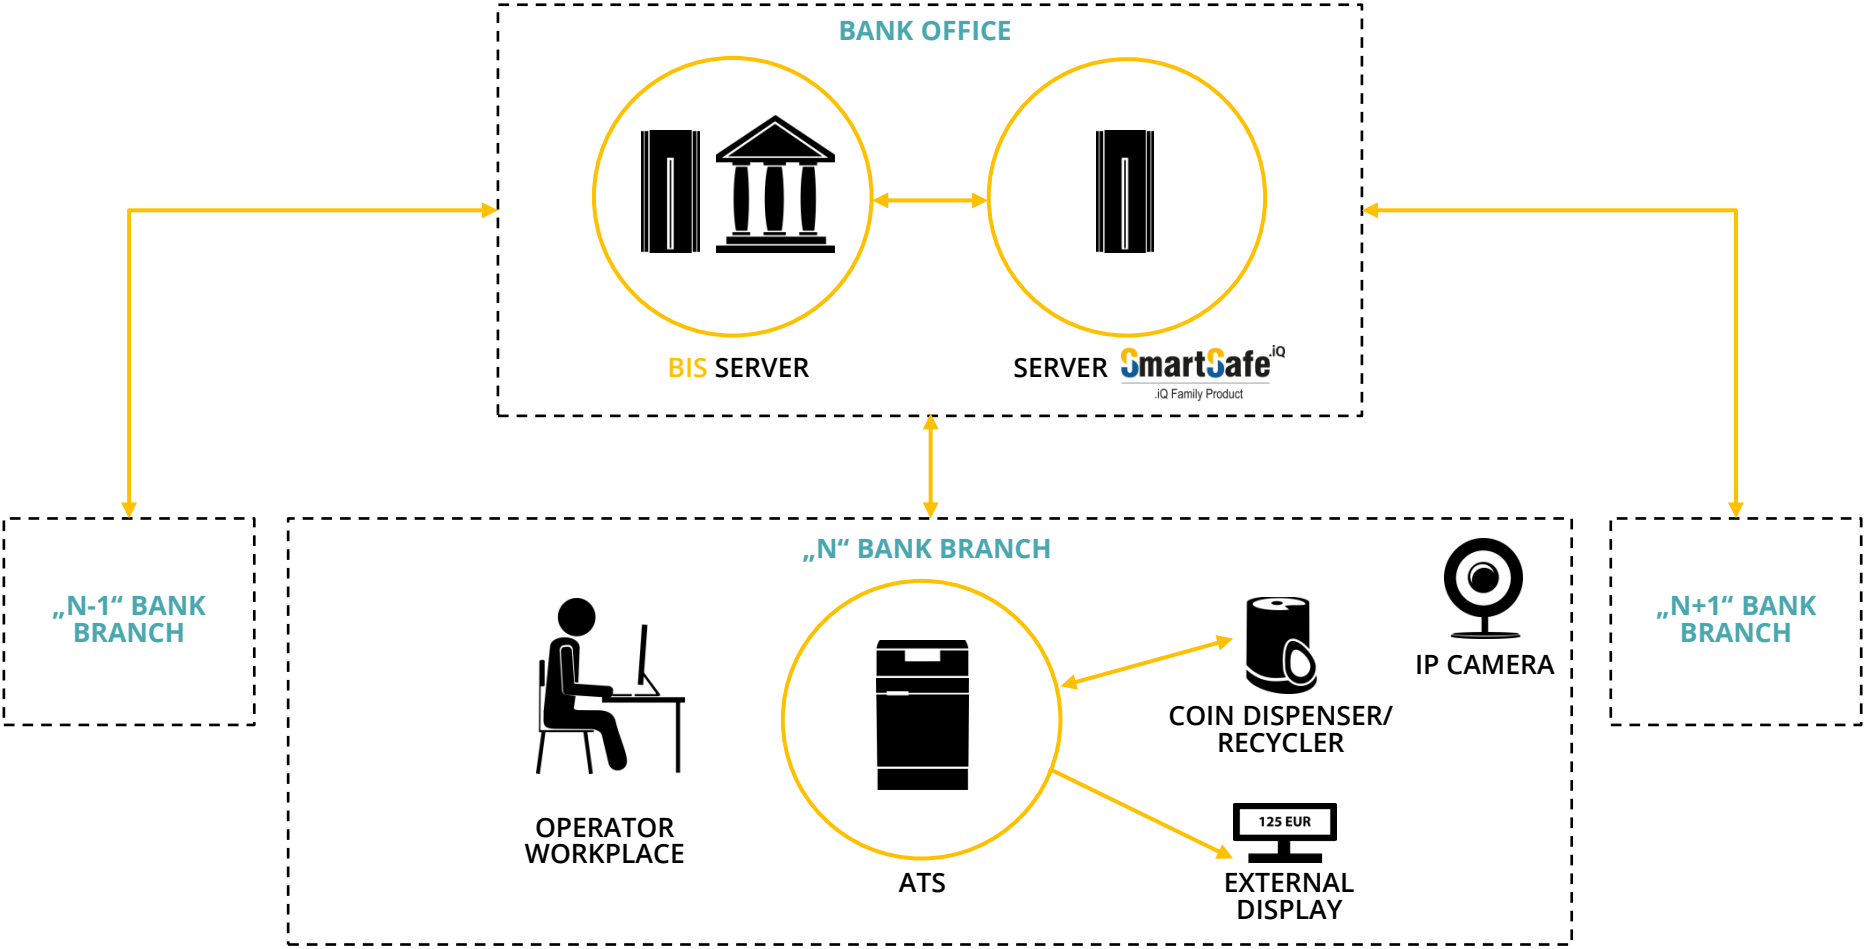

# Scheme of Connection via MOXA (2)

# Scheme of Connections via ATS Ports

# Functions and Advantages

## Multi-vendor

The solution is compatible with the hardware from major world's manufacturers such as **Wincor Nixdorf, CTS, DoCash, Glory, De La Rue, Talaris and Vertera** – and this list is constantly expanding. Integration with any new type of hardware takes about 2-3 months.

## Multicurrency

The solution supports simultaneous ATS operations with different currencies

## Multi-denomination

The solution allows ATS operations with 128 various currency denominations.

# Functions and Advantages

## Data security

Data transfer is carried out using the SSL (Secure Sockets Layer) protocol. Generation of security certificates within the system as well as their upload from external systems is supported.

## Video security

Integration with security solution **ATMeye**<sup>iQ</sup> allows to increase security through videomonitoring of events taking place in the ATS area.

## Flexible configuration

The possibility of connecting tellers' work places in general network allows the staff to switch between ATSS as well as to connect ATSS with other peripherals (coin dispenser, display, camera, card reader) under the SSL protocol.

# Functions and Advantages

## Full Amount Withdrawal / Dispense: Notes and Coins

For banks seeking to fully automate the cashiers workplaces **SmartSafe.iQ** features support of coin dispensers / recyclers allowing to issue the total amount (bills and coins).

## Reporting

The solution generates a wide range of various reports. An optional **Dashboard.iQ** business intelligence module allows to conveniently create any new required reports.

## Centralized control

**SmartSafe.iQ** provides centralized control over all cash operations.

# Integration with BISs

SmartSafe.iQ provides various tools for integration with BISs such as WEB services, Stored Procedures, JMS, DLL.

Currently SmartSafe.iQ integration has been implemented with the following BISs:

**Colvir CBS-3**

**М-БАНК**

**Forpost**

**Oracle Flexcube**

**ODB**

**Finacle**

**DCS**

**BISQUIT**

**Platon**

**Atlas II**

The integration with any new BIS takes 2-3 months.

A person in a white shirt is holding a smartphone in their right hand. The background is a blurred crowd of people, suggesting a public space or event.

# Mobile SmartSafe.iQ

## New Opportunities for Automated Teller Safes

**Mobile SmartSafe.iQ** is a new payment infrastructure based on ATS and mobile device. Among the main features of **Mobile SmartSafe.iQ** are usability, extended functionality, high security level, lower cost of service per point and reduction of workload of staff at the bank branch.

The new system allows to combine functions of the recycling ATM, self-service terminal, currency exchange machine and provides these services in a convenient smart phone interface.

# Features

- cash withdrawal;
- cash deposit;
- currency exchange;
- payments for goods and services;
- cash withdrawal from any (non-bank) account Cash Anywhere;
- provision of information from external information and billing systems;
- cash bundle count;
- cash exchange into larger or smaller bills.

# Complete Reporting

- cash report per ATS;
- report on ATS replenishments;
- report on operations during the selected period;
- ATS turnover during the period;
- report on cash balance;
- reports on unclaimed and deferred notes;
- report on settlements with service providers.

## ATS Network Monitoring

- ATSs current balance;
- hardware technical condition.

# Related Products

**Cash Management.iQ** – is a software solution belonging to .iQ product family, developed to automate and optimize the processes related with cash flow at all cash deposit / withdrawal points. This solution allows maintaining optimal amounts of cash in the whole network of ATMs, ATSS, vaults and bank branches.

**ATMeye.iQ** is an integrated hardware and software solution that provides additional safety and security for self-service devices and their users. The system monitors events in and around self-service devices 24/7, thereby reducing the risk of fraud and vandalism and helping to resolve disputes with customers.

**Dashboard.iQ** – control center for different modules of .iQ platform, based on the latest technology, providing quick access to information influencing the decision making process.(client-server mode or HTTPS protocol)

# Related Products

**Payments.iQ** – is a full-featured software solution for arranging of receiving payments (for utilities, taxes, penalties), selling all kinds of electronic services (e.g. tickets, recharge codes, vouchers, utilities and so on.), retail banking automation, network management of information and payment terminals and ATMs.

**ProView** is monitoring and IT service management software for self-service systems. **ProView** provides extensive functions covering administration, monitoring and control of self-service networks to ensure that they deliver maximum performance and availability.
