# BEETLE /iSCAN EASY SCO

# Compact, flexible and versatile self-checkout

#### Self-checkout is so easy

The BEETLE /iSCAN EASY SCO is a self-checkout designed to fit perfectly into your store, offering consumers choice and an improved checkout experience. With a BEETLE /iSCAN EASY SCO customers scan and pack their items into their shopping bags at their own pace. They can then pay for their shopping on the system using cash, cards or even newer technology, like NFC enabled smart phones.

# Made for all retail stores

Whether you have a grocery, DIY, pharmacy, convenience or electronics store, the BEETLE /iSCAN EASY SCO is the ideal solution to breathe life into your checkout area. It can easily be integrated into existing checkout lane furniture. The modularity of the systems is fully flexible and allows a customized configuration of counter-top components, such as a scanner, printer and screen. Value-added modules such as coupon acceptance, EFT-terminals and a variety of weight scales can also be integrated with ease.

#### **Based on standards**

With the BEETLE /iSCAN EASY SCO you can create a future proof, scalable and custom-built solution. It features best-in-class components in an optimized footprint. The system complies with industry regulations (ADA II) covering user ergonomic standards for self-service terminals, that further accentuates the advantages of the systems design and practicality for all users.

# **Cash automation**

The BEETLE /iSCAN EASY SCO can be integrated with a note and coin recycler, where any notes and coins used for payment are accepted and verified and then made available for use as change for subsequent transactions.

# **Benefits**

- Improved efficiency and customer service
- More customer choice
- Small footprint
- Optimized cash handling
- Scalable modular design
- Fully ADA II compliant

#### **TPiSCAN software platform**

TPiSCAN by Wincor Nixdorf is a modular software platform for selfservice terminals that integrates easily with existing POS applications. With its intuitive interface, TPiSCAN is used to control your BEETLE /iSCAN EASY SCO. Running on both Windows and Linux, TPiSCAN is based on international standards and has been developed to ensure optimum user guidance. The highly customizable application can be quickly and easily tailored to your own specific requirement so you can create a unique multimedia rich interface for your selfcheckout system.

#### **Services**

Wincor Nixdorf's fast, professional manufacturer service is available as an option for the BEETLE /iSCAN EASY SCO as part of the complete solution offer. Tailored services enable the highest possible system availability and security worldwide due to standardized service processes and efficient remote management based on the Wincor Nixdorf eServices Platform®. By request retailers can hand over their complete IT operations and the control of their cash processes to Wincor Nixdorf's service organization.

#### **Consulting and integration**

Our focus is to provide our customers with the best business benefits as quickly as possible. To make this happen, our Professional Services practice can provide analysis and concept design services to define the ideal deployment and integration scenario for your business requirements. We will also deliver integration services as part of our Professional Services portfolio to ensure the smooth and timely deployment of systems throughout your store network.
