

# Revento 9010

## Space-saving, modular reverse vending solutions for non-refillables

### Engage customers, protect profitability

To ensure profitability, retailers must maximize the sales value of every square meter of retail space – but many in-store reverse vending solutions require an extensive back-office footprint.

Designed with the requirements of compact store formats in mind, the Revendo 9010 solution has a stand-alone footprint. With no need to sacrifice valuable sales space for back-office components, retailers can deliver cost-effective reverse vending services for non-refillable bottles and cans without harming profitability.

With an intuitive touchscreen interface at the front end, retailers can use RVPlus software applications to extend the functionality of the solution: creating valuable new sales opportunities.

### Efficiency by design

Incorporating sophisticated space-saving technology, the Revendo 9010 delivers comprehensive reverse vending services within a two-Europallet footprint.

Thanks to a high-capacity compactor, retailers can set a larger interval between the periods for removing empties – minimizing labor requirements and freeing in-store personnel to focus on delivering high-quality customer service.

Every component – from the 8.4” touch screen to the fully integrated compactor – is optimized for the highest energy efficiency, enabling even greater cost savings and supporting sustainability programs.

### Drive sales and reduce total cost of ownership

By equipping the Revendo 9010 with intelligent RVPlus software applications, retailers can enable value-added features that shrink total cost of ownership. With a comprehensive range of software applications for tailored couponing, loyalty-card rewards, advertising and more, retailers can drive same-day sales at the reverse vending machine.

The complete and transparent integration of the solution with every in-store point-of-sale system enables retailers to offer a seamless

customer journey, without compromising on security.

### Protect the environment

Built on decades of industry experience, Wincor Nixdorf reverse vending solutions recycle more than €45 million worth of PET products every year.

With Revendo 9010 solutions, retailers can simultaneously protect the environment and drive the commercial benefits of reverse vending. To learn more, contact your Wincor Nixdorf representative today, or visit:

### Consulting and integration

Our focus is to provide our customers with the best business benefits as quickly as possible. To make this happen, our Professional Services practice can provide analysis and concept design services to define the ideal deployment and integration scenario for your business requirements. We will also deliver integration services as part of our Professional Services portfolio to ensure the smooth and timely deployment of systems throughout your store network.

### SWAP-Service

Wincor Nixdorf's service organization ensures high availability of all Revendo systems. Experienced field service engineers that can directly access OEM spare parts enable fast system recovery, according to the agreed contractual details.

### Benefits at a glance

- Maximizes selling space with a compact, two-Europallet footprint optimized for retailers with a floorspace of 100-400m<sup>2</sup>
- Complete integration with every in-store point-of-sale system enabling retailers to offer a seamless customer journey
- Reduces power requirements with an energy-efficient design, supporting retail sustainability objectives
- Minimizes manual labor and cuts costs using a high-capacity compactor to lengthen the duration between emptying intervals
- Assures customer adoption via an intuitive user interface that enables seamless customer experiences
- Nurtures customer loyalty through full integration with customer reward programs

### TECHNICAL DATA

#### Standard features

- Full graphic 8.4" Touch Display
- Interactive user guidance
- Additional signals in the field of vision in the bottle infeed to guide users
- Thermal printer
  - Paper width: 60 mm
  - Paper length: 500 m
- Manipulation protection system
- Full bottle recognition
- Door color:
  - Traffic red RAL 3020
  - Gentian blue RAL 5010
  - Grey aluminum RAL 9007
  - Anthracite grey RAL 7016
- LAN for online connection

#### Recognition data

- Single beverage containers: image processing, color recognition
- Processing speed: up to 40 bottles / minute
- Data capacity: almost unlimited

#### Options

- Individual door color (RAL color range)
- ISDN-Adapter or GSM-Router for online connection
- Barcode scanner
- Card reader

#### Basic data

- Footprint: (L x W x H) 138 cm x 182 cm x 172 cm
- Weight: 550 kg
- Power supply: 3 ~ 400 V / 50 Hz
- Conformity:
  - Machine directive, EMV, CE
  - Temperature range: +10°C to +40°C
